Q1 import java.util.Scanner;
class Ques1.

{

public static void main(String [] args)

{

Scanner s = new Scanner(System.in);

System.out.println("enter any number: ");

int n = s.nextInt();

int M = n;

int a = 1;

while (n != 0)

{

a = a * n;

a --;

System.out.println("factorial of " + M + " is " + a);

}

}

Q2

```
import java.util.Scanner;
```

```
class Ques2
```

```
{
```

```
    public static void main(String[] args) {
```

```
        Scanner sc = new Scanner(System.in);
```

```
        System.out.println("Enter 3 number:");
```

```
        int n1 = sc.nextInt();
```

```
        int n2 = sc.nextInt();
```

```
        int n3 = sc.nextInt();
```

```
        int sum = n1 + n2 + n3;
```

```
        System.out.println("Sum is: " + sum);
```

```
    }
```

```
}
```
